Filtration Cooler

New Features for 2019

**FREE SHIPPING FOR ALL
ORDERS PLACED FROM
NOW THRU JUNE 30**

MINIMUM PALLET OF 18

Updated styling provides a taller and sleeker look. High styling and value at a low cost.

Multiple improvements for performance and long term reliability.

An updated and upgraded base cooler that will be attractive in any account.

Features and Improvements

- 2.0L / .53G stainless steel hot tank with all SS fittings between hot and cold tanks
- 3.8L / 1G polished stainless steel cold tank with laser welded joints and seams
- A new “D” shaped copper evaporator tubing means one side of the tubing creating more contact surface area with the cold tank which improves cold water performance.
- Evaporator copper tubing thickness is increased by 33%, providing longer life and resistance to lifetime refrigerant leaks.
- Dispense 4 inches higher for ease of dispense.
- Aluminum silicate fiber blanket hot tank insulation. No dry burn and improved insulating factor.
- Upgraded internal supports to increase durability and reduces shipping or handling issues
- No external base plate. New lock in baffle and baffle nut.
- Dual mechanical float for enhanced reliability.
- Larger rear cabinet opening for easier chassis removal.
- Available in black and white. Cup dispenser optional.
- eTL listed
